# What is XME.digital business?

XME.digital

**XME.digital** was founded in 2015 by a team of telco professionals to deliver the best knowledge from the telecom industry to other business domains.

Since the beginning, we have confirmed ourselves as a reliable supplier of complex turnkey software solutions, services for the development of software components, and the management of dedicated development teams.

# Countries XME.digital delivers

Customers' success and growth is our  
#1 priority and business driver.

**We build a platform so you could scale  
your business.**

# We support your business leadership journey

"XME.digital provided a scalable middleware platform that facilitated process automation and orchestration. Since integrating the platform in 2019, the XME.digital team has offered uninterrupted 24/7 technical support with a strict SLA for the MNP solution and the XME application platform in general"

**Konstantin Zhilin**  
CIO at Vodafone Ukraine

## Case study

XME.digital

# Implementation of Middleware

XME.digital was chosen as one of the core platforms of client's infrastructure.

Industry: Telecommunications

An MNO with nearly 20M subscribers was looking for a tech partner to develop a solution combining all the MNP-related processes in a single point of control. The solution should be flexible, scalable, and ready for various integrations with both internal and external software.

## Challenges

- Service order management processes orchestration
- Tons of internal & external integrations
- Integration to 3rd-party platforms and financial services

## Built with XME.digital

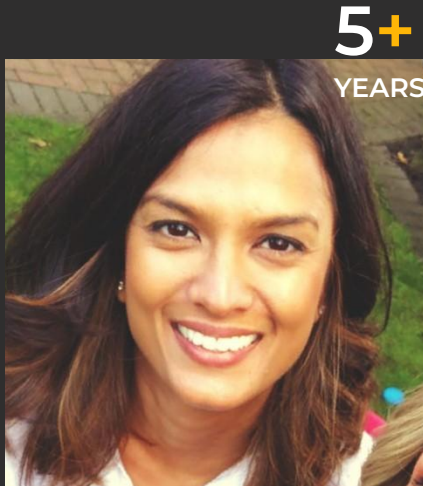

- XME.digital as a middleware platform
- Core platform functionality & managing customer adaptations
- Post-paid subscriptions
- Scalable software architecture

## Results

- Unified point of control for MNP
- E2E provisioning of core components
- Flexible integration
